Pre-assembled Stent-Introducer Sets

Pre-assembled Stent Introducer Set consists of a guiding catheter and pusher in one device. The set is a convenient option to single components for the placement of straight and curved biliary stents, which require a guiding catheter. The set has an extra port to inject contrast medium during the entire procedure and while a guide wire is in place. Radiopaque metal markers on the guiding catheter and the pusher allow a precise positioning under X-ray view.
